ARIB KHAN

DATA ANALYST | BUSINESS ANALYST

Ottawa, Ontario aribmkhan1@gmail.com linkedin.com/in/aribmkhan
github.com/aribmkhan

PROFILE

Business-focused analyst with a B.S. in Business Analytics and experience translating data, client requirements, and operational questions into practical insights. Skilled in Python, SQL, BigQuery, customer analytics, visualization, and stakeholder communication.

SKILLS

Analytics & ML: Python, SQL, Pandas, Scikit-learn, K-Means, feature engineering, data validation

Reporting & Cloud: Google BigQuery, Google Cloud, Streamlit, Altair, Power BI, Excel, KPI reporting

Business Analysis: Requirements discovery, segmentation, stakeholder communication, strategic recommendations

FEATURED PROJECT

NovaMart | AI Customer Intelligence Platform

- Analyzed 20,000 synthetic customers and 125,000 transactions with Python, SQL and Google BigQuery; built an end-to-end data-to-dashboard analytical workflow.
- Built K-Means segmentation of 19,738 purchasing customers, identifying three behavioral groups; the high-value active group accounted for 77.9% of observed revenue.
- Evaluated clustering quality and business interpretability; integrated Claude-based aggregated insights, validated natural-language SQL, and a Streamlit dashboard.

EXPERIENCE

Lumenta Digital | Business Analysis, Digital Analytics & Client Solutions

- Contributed to acquiring five clients representing more than $15,000 in project value through discovery, solution scoping, and client communication.
- Supported analytics, reporting, web solutions and campaign performance analysis to translate business requirements into delivered digital solutions.

Aamanto Technologies | Business Development & Customer Needs Analysis

- Acquired more than 15 clients through researched prospecting, outreach, needs assessment, and tailored website solution discussions.
- Qualified leads and documented client communication and follow-up activities in Salesforce CRM.
